LEARNFLOW

Interactive Learning Platform with Clickstream Analytics

📦 GITHUB REPOSITORY

github.com/luffy-taro-106/et-617-learnflow

WHAT'S INCLUDED

- **Full source** + thorough README
- **Demo video** — `docs/learnflow-demo.mp4` (+ voice-over script)
- **Presentation** — `LearnFlow.pptx` / `.pdf`
- **Architecture** deep-dive + diagrams

FEATURE HIGHLIGHTS

- Learner & admin **login** (bcrypt)
- **Text · video · quiz** lessons
- Full **clickstream** tracking → SQLite
- Analytics dashboard + **CSV / Excel / JSON**

RUN IT LOCALLY

```
npm install && npm run seed && npm start → localhost:3000
```

👩‍🎓 Learner: `demo@learnflow.dev` / `demo123`

🛠️ Admin: `admin@learnflow.dev` / `admin123` (sees all learners' clickstream)

CLICKSTREAM FORMAT

Every interaction is stored in an indexed SQLite `events` table modelled on the **Moodle logstore** from the reference sheet — `Time` · `Event context` · `Component` · `Event name` · `Description` · `Origin` · `IP address` — and exportable in that exact column order.

Node.js | Express | SQLite | Vanilla JS | Neo-brutalist UI
